Capacity

Vision-Guided Tow Tractor

Savings. Safety. Productivity. **Seegrid's Robotic Industrial Trucks Deliver.**

So advanced, it's simple. The unmanned GT10 Tow Tractor automates the movement of your flatbed cars, trains or carts with vision-guided technology. Attach the load to the GT10, type in the route on the keypad and the Robotic Industrial Truck travels without wires, tapes or lasers. From parts-to-line to end-of-line product delivery or inventory pallet moves, the GT10 will reduce your cost per move. Extend workforce productivity, improve safety and lower operating costs while giving your operations personnel tractor and route control.

The Seegrid® series of Robotic Industrial Trucks gives you the most in operational flexibility. From a single truck to multiple units, you can have a complete vision-guided system - more savings, safety and productivity.

Specifications

Capacity

Max. Towing Capacity 10,000 lbs
 5th Wheel Arm
 Optional Custom Hitches
 Learns and Stores 15 Miles of Routes
 Unlimited Individual Routes

Travel Speed

3 mph at Full Load
 0-Full Speed in 3 Seconds at Full Load

Battery

24v(3) 510 amp/hr Batteries
 Battery Discharge Indicator
 with Low Battery Signal

Dimensions and Weight

Width: 36"
 Height - with Camera: 81.5"
 Truck Weight: 1195 lbs

Capabilities

Up to 5% Grade
 Heavy-Duty, Powder-Coated
 Steel Frame and Hood
 Non-Marking, Foam-Filled,
 No Maintenance Tires
 Dynamic Braking
 Industry-Standard, Self-Diagnostic
 Motor Controllers

Safety

EasyView LED Lightstack
 Meets ANSI/ITSDF Standards
 Independent Laser Obstruction Sensing System

NEW!

Cost Effective Initial Investment AND Low Total Cost of Ownership

Seegrid's vision-guided Robotic Industrial Trucks deliver affordable transport with a rapid payback period. This provides you with flexibility and benefits to spare, including:

- Allows your workers to focus on higher value tasks within your facility
- Perform multiple routes for one shift and easily change routes for second and third shifts
- Reduce dependence on seasonal staffing or temporary workers
- Meet and exceed performance standards by lowering manned travel distances
- Quickly and efficiently train your personnel on set-up and maintenance on familiar platforms, reducing reliance on third party vendors and lowering costs in the process
- Consistent safe behavior and controlled truck speeds improve facility safety
- With Seegrid's **WalkThroughThenWork**® technology, your GT10 sets up in hours, not weeks or months

Visual Navigation System
