Introducing Speedshield Fleet Online

- taking Fleet Management to the next level...

“Online access to your lift truck fleet is a vital part of today’s fleet management approach. The introduction of telemetry, or true wireless fleet management, drives maximum fleet efficiency, improves safety, reduces carbon footprint, and lowers your overall material handling costs.”

“Speedshield Plus” operator module features:

- Rugged wireless module - allows easy operator interface through high-vis LCD display
- Easy Installation - and available on all brands/models of lift trucks
- Pre-shift Checklists - “paperless” OSHA checklist eliminates need for managing paper checklists
- Operator I.D. Access - allows access to trained and authorized drivers only
- Speed Readout - shows actual lift truck speed w/ audible “over-speed” alert
- Idle Timeout - senses and shuts down idle lift trucks, reducing fuel/energy consumption
- Impact Monitor - alerts operators, shuts truck down, and emails management on direction/severity of collision

“FleetOnline” customer web portal features:

- 24/7 web based access - accurate fleet reports at all management levels
- No Software Installation - requires no customer I.T. infrastructure cost, upkeep, or support
- P.M. Service Interval Reports - current and past due P.M.s w/ email reminders
- Operator Log-in History Reports - detail history by location, employee, department, and/or unit
- Utilization Reports - shows utilization percentages, traction hours, idle time, and other key information
- Avoidable Damage Reports - impact time/date and severity by operator/unit
- Operator Training Reports - shows which operators are due for re-certification w/ reminders

“Green – let me introduce you to \$\$Green” With Speedshield FleetOnline, being environmentally friendly doesn’t have to translate into breaking your piggybank! Speedshield not only has a strong initial payback and Return on Investment - saving your company \$600.00 to over \$1,000.00 per unit annually - but it can significantly reduce your fleet emissions and/or energy consumption. **All of this for about \$1.00 a day - how’s that for being green while saving lots of green?**
